ABOUT ME

I'm a final-year Computing and Automation student at the **Faculty of Technical Sciences**, University of Novi Sad. I'm currently seeking internship opportunities to apply and improve my knowledge and gain experience.

EDUCATION

2021 - Present
Faculty of Technical Sciences

Computing and Automation
In third year i continued on **Applied Computer Sciences module.**

SKILLS

Back End	Front End	Languages	Aditional
• PostgreSQL	• React	• SQL	• Ability to read, write and communicate on English.
• MySQL	• React Native	• Java	
• Spring boot	• HTML	• JavaScript	
• .NET	• CSS	• C#	

EXPERIENCE

Third year

- Developed a tourism web application, during third year of studies in a team of 4 using **.NET** for the backend and **Angular** for the frontend. Collaborated via **GitHub** for version control and team coordination.

- Prticipated in development of a simple web application in team of two using **Node JS** for the back end and **React** for the front end. Simple application where the idea was to gain hands on experience with **HTTP** protocol and communication between servers.

Fourth year

- Contributed to building a tourism web application in a **team of 16**, using .NET and Angular. Focused on effective teamwork, clean code principles, and regular communication with end users to gather feedback . Utilized GitHub for collaboration and version control across multiple sub-teams.

- Participated in development of a social media web application in team of 3, using **Spring boot** and Angular. Focused on backend part with **PostgreSQL** RDBMS, and implementation of **Spring security** for user authentication. Implemented simple mail server for sending emails to users.

Solo (private) Projects - more details on github page

- Developed a mobile application for tracking car sales listings using **React Native** and **SQLite** local database. Part of that was creation of a **web scrapper** that runs on separate Express server.
